

# Odd

# Even

end with

end with

1, 3, 5, 7, 9

0, 2, 4, 6, 8

examples:

9  
17  
23  
451  
7055

examples:

2  
10  
22  
34  
446  
11158

Tip:

If you are unsure if a number is odd or even, use counters to count out the number (by twos).  
If you have one left over without a partner, the number is odd.  
If you have pairs and everyone has a partner, the number is even.
